RJI Regional Jobs Initiative

Strengthen and grow your local industry!

What are industry clusters? Why are they important?

Industry Clusters are groups of competing, collaborating, and interdependent businesses working in a common industry and concentrated in the Fresno County region. In collaboration with attraction of new businesses as well as business expansion and retention of existing businesses, the **EDC Clean Energy Cluster creates a synergetic environment to strengthen and grow organizations by tackling common industry issues.** Clusters collaborate within themselves, across clusters, and with public partners in order to develop creative solutions to complex challenges.

Current Cluster Focus

Each EDC Industry Cluster has identified specific areas of focus. Check out some of the unique initiatives in progress right now!

What are you interested in supporting?

- Inventorying and promoting new, stimulus-funded and other, green training programs
- Maximizing cost savings by implementing methods of energy efficiency and renewable energy
- Supporting the industry by investing in the improvement of our applicant pools through workforce development opportunities

Other Partner Clusters

The 12 Industry Clusters are managed in partnership with vital community organizations, including the Regional Jobs Initiative. Besides the Industry Clusters above, the other clusters include:

- Arts & Culture
- Food Processing/Ag Growers
- Healthcare
- Public Sector
- Tourism
- Water Technology

For more information on any of these clusters, please visit: **www.fresnorji.org**.

Thank you for your participation!
